Markdown cheat sheet

A short sheet of the [Markdown], Markdown Extra (http://michelf.com/projects /php-markdown/extra/), and [SimpleLink] syntax. See the the complete Markdown syntax (http://daringfireball.net/projects/markdown/syntax) for extra tasty details.

warpedvisions (http://warpedvisions.org/)

About (/about)   @Twitter (http://twitter.com/#!/robotpony)   RSS (/feed)

```
### Header 3 ###              (Hashes on right are optional)
#### Header 4 ####
##### Header 5 #####

## Markdown plus h2 with a custom ID ##          {#id-goes-here}
[Link back to H2](#id-goes-here)

This is a paragraph, which is text surrounded by whitespace. Paragraphs can be on one
line (or many), and can drone on for hours.

Here is a Markdown link to [Warped](http://warpedvisions.org), and a literal <http://link.com/>
Now some SimpleLinks, like one to &#91;google&#93; (automagically links to are-you-
feeling-lucky), a &#91;wiki: test&#93; link to a Wikipedia page, and a link to
&#91;foldoc: CPU&#93;s at foldoc.

Now some inline markup like _italics_,  **bold**, and `code()`. Note that underscores in
words are ignored in Markdown Extra.

![picture alt](/images/photo.jpeg "Title is optional")

> Blockquotes are like quoted text in email replies
>> And, they can be nested

* Bullet lists are easy too
- Another one
+ Another one

1. A numbered list
2. Which is numbered
3. With periods and a space

And now some code:

    // Code is just text indented a bit
    which(is_easy) to_remember();

~~~

// Markdown extra adds un-indented code blocks too

if (this_is_more_code == true && !indented) {
    // tild wrapped code blocks, also not indented
}

~~~

Text with
two trailing spaces
(on the right)
can be used
for things like poems

### Horizontal rules

* * * *
****
-------------------------

&lt;div class="custom-class" markdown="1"&gt;
This is a div wrapping some Markdown plus.  Without the DIV attribute, it ignores the
block.
&lt;/div&gt;

## Markdown plus tables ##

| Header | Header | Right  |
| ------ | ------ | -----: |
|  Cell  |  Cell  |   $10  |
|  Cell  |  Cell  |   $20  |

* Outer pipes on tables are optional
* Colon used for alignment (right versus left)

## Markdown plus definition lists ##

Bottled water
: $ 1.25
: $ 1.55 (Large)

Milk
Pop
: $ 1.75

* Multiple definitions and terms are possible
* Definitions can include multiple paragraphs too

*[ABBR]: Markdown plus abbreviations (produces an &lt;abbr&gt; tag)
```
